

Annual Integrated Pest Management Notice For The School Year 2017 – 2018

Dear Parent, Guardian, or Staff Member:

This notice is being distributed to comply with the New Jersey School Integrated Pest Management Act. The South Brunswick Township Public Schools have adopted an Integrated Pest Management (IPM) Policy and has implemented an IPM Plan to comply with this law. IPM is a holistic, preventive approach to managing pests that is explained further in the schools IPM Policy included with this notice.

All schools in New Jersey are required to have an Integrated Pest Management Coordinator (IPM Coordinator) to oversee all activities related to IPM and pesticide use at the school.

The IPM Coordinator for **The South Brunswick Township Public Schools** is:

Name of IPM Coordinator: Todd Amiet

Business Phone number: 732-297-7800 ext. 5109

Business Address: 4 Executive Drive, Monmouth Junction, NJ 08852

The IPM Coordinator maintains the pesticide product label, and the Safety Data Sheet (SDS) (when one is available), of each pesticide product that may be used on school property. The label and the SDS are available for review by anyone via the district website www.sbschools.org. The SDS sheets are found under the tab Departments/Buildings & Grounds. The IPM Coordinator is available to parents, guardians, and staff members for information and to discuss comments about IPM activities and pesticide use throughout the district.

As part of a school pest management plan all schools may use pesticides to control pests. The United States Environmental Protection Agency (EPA) and the New Jersey Department of Environmental Protection (DEP) register pesticides to determine that the use of a pesticide in accordance with instructions printed on the label does not pose an unreasonable risk to human health and the environment. Nevertheless, the EPA and the DEP cannot guarantee that registered pesticides do not pose any risk to human health, thus unnecessary exposure to pesticides should be avoided. The EPA has issued the statement that where possible, persons who are potentially sensitive, such as pregnant women, infants and children, should avoid unnecessary pesticide exposure.

Integrated Pest Management in NJ Schools
 Chemical List Summary: July 1, 2016 – June 30, 2017
 South Brunswick Schools
